* fork travel used for calculating the geometry showed in this table (in millimeters) ** recommended fork travel range (in millimeters)

- reach** – horizontal distance from BB center to HT center
- stack** – vertical distance from BB center to HT top
- ST** – seat tube length (BB center to ST top)
- TT** – top tube length (actual)
- eTT** – top tube length (effective)
- CS** – chain stay length
- HT** – head tube length
- HT angle** – head tube angle
- eST angle** – effective seat tube angle
- BB drop** – bottom bracket height (BB center to WB)
- WB** – wheel base
- standover** – vertical distance from the ground to TT top (in the middle of the TT length with wheels assembled)
